- 1 Artificial Intelligence in Gaming
- 2 Regulation update: M&A finalization, TikTok ban
- 3 Epic Games opens up Epic Games Store (EGS) publishing: Going head-to-head with Steam
- 4 Epic Games brings UGC to its 70m Fortnite MAUs
- 5 Google's shift to cloud services
- 6 Roblox successfully ages up

1 Artificial Intelligence in Gaming

AI as a trend is not a net new investment trend

AI equity financing (not gaming-specific) Q1 2019 through Q1 2023, \$b

— Number of deals ■ Venture funding

- While AI has been a hot trend in gaming, at the macro level, it has been a hot investment trend since 2020; the spike in funding in 2021 was likely due to larger deal sizes
- Gaming has recently been the next industry to receive a wave of investment interest
- In gaming, AI investment trends over the past quarter include AI-generated assets and conversational AI

Regulation update

M&A finalization, TikTok ban

MSFT <> ATVI

- No update from the FTC
- Japan Fair Trade Commission approved the acquisition on 3/28
- The EU is likely to approve the deal, with the full verdict due by the end of April
- Sony remains committed to its attempt to block the deal outright even with a 10-year licensing deal being offered by Microsoft
- For context, Playstation still has a 70:30 global console market share

Tik Tok Privacy Concerns

- TikTok is on track to be the most adopted social platform for Gen Z
- Concerns around CCP influence may shut down access in the US, with other markets to follow
- Unclear how the US banning TikTok will affect gaming near term - while a popular category, content is not a product of direct marketing / advertising spend
- Banning TikTok could have future negative effects on gaming UA

Meta completes acquisition of Within

- The FTC abandoned its suit to Meta from acquiring Supernatural developer, Within
- As anticipated, the FTC did not have a strong enough reason to block the acquisition for anti-competitive reasons
- The deal closed in February 2023

Source: Microsoft, Meta, FTC, Japanese Fair Trade Commission, The Verge

3 Epic opens up Epic Games Store (EGS) publishing

- Epic's distribution strategy has historically focused on a curated games library with a particularly strong emphasis on exclusives
- In March, Epic announced that its game store (EGS) was launching self publishing tools for the first time – this is the first major competitive threat to Steam in the game distribution market since the announcement of EGS itself back in 2018
- Today, EGS has ~68m MAUs (vs Steam's 135m+ MAUs)
- EGS will not only provide developers all the tools they need to build, test, and distribute games, it will also offer a compelling fee structure of 12% (vs Steam's 30%)

Source: Epic Games, Steam, VentureBeat

Epic brings UGC to its 70m Fornite MAUs

Epic sidesteps UGC “chicken-and-egg” problem by leveraging Fornite audience

- UGC has received a lot of attention over the past 5 years (Roblox), with clear benefits - by outsourcing development to a passionate player base, platforms are able to more efficiently scale their content library
- However, one of UGC's core challenges is overcoming the “chicken-and-egg” problem, where a lack of players reduces creators' willingness to build new experiences, while a lack of compelling gameplay disincentivizes players to come utilize the platform
- Epic is able to solve for this by integrating directly with Fornite, one of the most popular games of all time
- To capture the attention of prospective builders, Epic has pledged 40% of Fornite's net revenue to creators

Source: Epic Games

5 Google's shift to cloud services

Google Stadia officially shut down in January 2023

Google Cloud gaming customers

- Google launched its latest gaming initiative through Google Cloud: Google Cloud for Live Games
- This shift from owning the medium to owning the infrastructure is a better fit to leverage the Google Cloud infrastructure
- There are 3 primary levers for this strategy:
 - **Serve players everywhere:** helps developers connect players with game servers built on the world's largest, most secure network
 - **Collect and organize game data:** easily store critical game and player data at scale with extremely low latency
 - **Unlock player and game insights:** helps developers understand what's working to find and retain players with Google's analytics and AI

6 Roblox aging up successfully

22% increase in daily active users YoY

Daily active users by quarter, millions

- Since Roblox announced they were expanding support for their over-13 age demographic, Roblox has seen a consistent increase in both daily active users (DAUs) and revenue
- In February, Roblox reported that they had 67.3m DAUs (+14% increase since Q4 2022, +22% increase YoY; there has also been a ~20% increase in concurrent users in Q1 2023 vs Q4 2022)
- While a demographic breakdown for Q1 is still unreleased, we anticipate that the increase in activity is due to the over-13 age demographic
